

The diagram illustrates a vertical sheet of paper with a horizontal fold line. A dashed green line represents the 'Full Bleed Size', which is the entire area of the paper. A solid orange line represents the 'Document Trim Size', which is a smaller rectangle centered within the bleed area. A horizontal dashed red line represents the 'Horizontal Fold' line, which bisects the entire sheet. Three labels with leader lines point to the right side of the diagram: 'Full Bleed Size' (red box) points to the dashed green line, 'Document Trim Size' (orange box) points to the solid orange line, and 'Safety Area' (green box) points to the space between the trim and bleed lines.
